INTRODUCTION

Sale documents online poses a risk for intellectual Property. Risk of seeing your documents shared for free on many platforms, without possibility to stop it. That's why Secured PDF Downloadable Products extension is here. Add different kind of protection on PDF files bought by your customers to discourage them to share the files.

The running is very simple:

- 1) Your customer buy a downloadable PDF file
- 2) In his account he goes to "My Downloadable Products" section
- 3) When he clicks to download the PDF, Secured PDF Downloadable Products get the PDF, add protections and send it to your customer.

FEATURES

- 1) ENABLE / DISABLE PDF FUNCTIONS
 - ✓ Print
 - ✓ Copy text
 - ✓ Modify text
 - ✓ Annot-forms
- 2) ADD A PASSWORD FOR OPENING
- 3) STAMPING PDF IN EACH PAGE (WATERMARK AND FOOTER)
 - ✓ Custom text
 - ✓ Customer first name
 - ✓ Customer last name
 - ✓ Customer email
 - ✓ Customer address
 - ✓ Customer City
 - ✓ Customer phone
 - ✓ Set font family, size, color and form (Italic, Bold, Underline)
- 4) SUPPORT BOTH PORTRAIT AND LANDSCAPE PAGES

SETUP

1) DISABLE COMPILATION

If compilation is enabled, please disable it in *System* → *Tools* → *Compilation*

The screenshot shows the 'Compilation' tool interface. At the top right, there are two buttons: 'Disable' (highlighted with a red box) and 'Run Compilation Process'. Below the buttons is a table titled 'Compilation State' with the following data:

Compilation State	
Compiler Status	Enabled
Compilation State	Compiled
Collected Files Count	6653
Compiled Scopes Count	4

2) COPY AND PASTE FILES

Copy files from the zip to your Magento in accordance with Magento folder tree.

3) REFRESH THE CACHE

Refresh the cache, even if disabled, in *System* → *Cache Management*

4) DISCONNECT AND RECONNECT TO ADMINISTRATION PANEL

To access to the Secured PDF Downloadable Products extension configuration interface you need to disconnect and connect again to the administration panel.

5) CONFIGURE THE EXTENSION

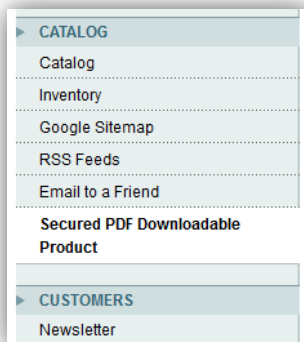

Secured PDF Downloadable Products configuration is available in *System* → *Configuration* → *Secured PDF Downloadable Products (Catalog)*.

For more information please refer to “how to use” section.

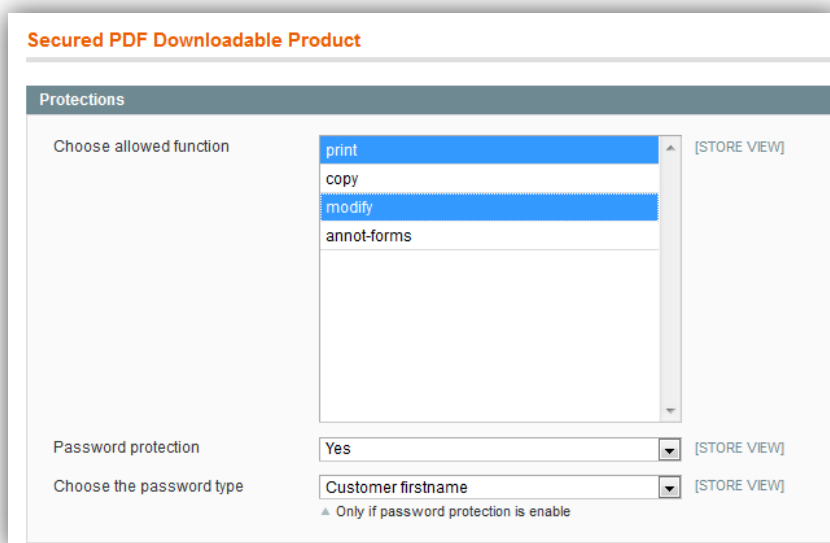

HOW TO USE

EXTENSION CONFIGURATION

- 1) Go to : [System](#) → [Configuration](#) → [Secured PDF Downloadable Products \(Catalog\)](#)

- 2) Choose protections options

- **Choose allowed function (default: none):** Select one or many options to allow it. In this screenshot "print" and "modify" are selected, that means PDF files could be printed and modified but the text can't be copied/pasted and annotations are disabled.
- **Password protection (default: no):** Select "Yes" if you want the PDF files to have a password to open.

- **Choose the password type:** Choose a kind of password on PDF files related to your customers information. You have the choice between four combinations: *Customer Email*, *Customer firstname*, *Customer lastname*, *Customer firstname + lastname (attached)*.

For example if you choose *Customer firstname* as password, all PDF files downloaded by the customer will be protected with a password, his firstname.

/\ Works only if password protection is set to "Yes".

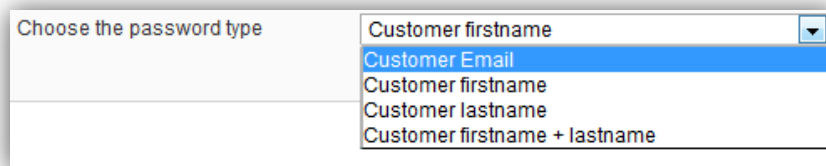

/\ The password is always set in lowercase!

Example:

password type: customer first name

customer first name: John

the password will be: john

The image shows a screenshot of a web form. On the left, there is a label "Choose the password type" next to a text input field. To the right of the input field is a dropdown menu. The dropdown menu is open, showing a list of four options: "Customer firstname", "Customer Email", "Customer firstname", and "Customer lastname + lastname". The "Customer Email" option is currently selected and highlighted in blue.

3) Choose footer print options

Footer print

Enable Footer Print: Yes [STORE VIEW]

Custom text: This is a protected document [STORE VIEW]

Customer information to display: firstname [STORE VIEW]
